

# ISOVINILE

Characteristics: Monosheet panel with insulation in rigid polyurethane or polyisocyanurate foam for roofing with a minimum slope of 5%. It is characterized by the presence of a particular interior laminate in white vinyl.

Options: The use of vinyl on its interior face and its ease of installation makes it a very convenient economic solution for the agro-industrial and livestock sectors. Proper placement ensures resistance to stress. The use of fixing clips with seals is recommended.

## Benefits:

- Economic solution as roofing
- Easy-to-clean material
- Improved internal appearance
- Greater resistance
- Lightweight, requires less structure

Specifications: Standard Length: Minimum 2.50 m, maximum 12 m (Subject to transportation availability)

Effective Width	39 3/8" - 1000 mm
Joint	Tongue and groove
Thickness	1" 1 1/2" 2" 2 1/2"
External Face	Pre-painted Galvanized Steel (EN10346)
Internal Face	White Vinyl Laminate
Foam Density	40 kg/m <sup>3</sup> ± 10%
External Finish	Polyester Coating / Available in Embossed
Internal Finish	Vinyl
Fixing	Exposed / Fixing Clips
